

Hogg Construction

FCI, Inc. York, PA

Project Highlights

- Hogg constructed the original FCI facility in 1974 and continues to work with FCI to perform renovations and additions
- Hogg aided in the setup and design of new manufacturing processes
- Hogg supplemented FCI maintenance crew in maintaining production lines and maintaining facilities functionality and attractiveness.

"These ongoing renovations were much smoother than we anticipated due to the expertise and efficiency of your people and subcontractors. In addition to the job you were contracted to do, there were other unplanned projects that seemed to arise. Some of these "rush" jobs required after hours labor, and once again, you supplied the necessary crew to do the job and did it well. Our facility has turned into a very pleasant workplace and thanks to Hogg Construction, we have received many compliments on our new look."

-Gretchen Brumbaugh, Facilities Manager
