

“Our choice of Hogg Construction has proven to be the best! The project manager and project superintendent treated the project as if they were building it for themselves. They were diligent and respectful.....The design/build process was chosen as it afforded the best control of design, engineering, and costs.”

*- Edwin C. Perry, Chairman
Facility Development Committee*

Project Highlights

- SmartBuild_{sm}—Design/build project began with master plan and continued through final design, permits, and construction
- The building design successfully reflects the traditional rural character of the community
- 13,000 square foot two-story administrative/classroom/sanctuary facility
- Worship seating for 350
