

Hogg Construction

Helping Up Mission Baltimore, MD

Project Highlights

- 32,000 square foot renovation of former hospital/clinic into residential units and executive offices
- Renovated 100+ year old buildings to provide a modern appearance
- Project included special structural challenges by temporarily supporting two existing masonry buildings while installing multiple grade beams

“The general attitude of Hogg Construction was always focused on customer satisfaction and Hogg has succeeded. I think the proof of all this emphasis on customer satisfaction is the reality that good, solid relationships were built by all parties involved.”
- Dave Turnbaugh, Staff Administrator
